

Opulence

THE HALLMARK FOR LUXURY EASY ACCESS SHOWER ENCLOSURES

CONTOUR
built-in independence

VISION

For almost 60 years, Contour Showers has been recognised as a market leading UK manufacturer of shower doors, originally manufacturing high quality sliding doors to major mail order catalogues, including Kays and Empire Stores, before moving into making high quality, half height assisted shower enclosures and shower trays. Contour Showers are proud to be setting the standard for quality once again, with our Opulence product range offering a superior selection of luxury yet affordable glass shower enclosures.

Designed especially for level access, low level and easy access shower trays as well as wetrooms, our beautiful glass shower enclosures feature 6mm toughened, self cleaning safety glass and 180° rise & fall solid brass, chrome plated door hinges, keeping you safe and assured as you shower.

Available in a variety of practical and flexible sizes to take full advantage of space, our range embraces full height fixed panels with split level, independently opening door panels for a corner or alcove setting to create an enclosure of your choice when assisted showering may be required.

QUALITY

When it comes to quality we don't cut corners. We design, and manufacture the majority of our products so we are in total control of the end result and can guarantee their quality.

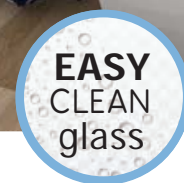

As part of our CE certification, all doors have been rigorously tested and quality checked to provide you with a product that will withstand the test of time.

PRACTICALITY

Designed to be used by all the family and to suit any bathroom layout, including square or rectangular corner installations and alcove settings between three walls to replace a bath tub.

1. Easy to grip door handle. **2.** 180° rise & fall door hinges allow doors to open smoothly but seal tightly. **3.** Flip over latch to prevent doors accidentally opening (optional accessory). **4.** Unique, chrome towel rail connects full height enclosure top & bottom glass panels. **5.** Easy grip internal door handle with integrated finger channels. **6.** Fixed panel 45° strengthening stabiliser bar.

The Opulence range of beautiful glass shower doors are designed to make access to showering simple for all.

Each exceptional shower enclosure is built to last, with polished chrome wall profiles, chrome plated, solid brass 180° rise & fall door hinges and fittings.

Opulence glass shower doors uniquely feature a fixed wall panel to help reduce overspray from the shower and to avoid sanitaryware.

You can be confident your distinctive Opulence enclosure will withstand the test of time. Easy Clean glass coating helps to keep both sides of the glass looking brand new and reduces staining between cleaning.

They also have a lifetime warranty which is your guarantee of quality!

If you prefer a wetroom with vinyl safety flooring, our coved profile will accommodate the coved finish where the flooring meets the wall.

No shower rooms are the same so we have a collection of glass shower doors for you to choose from.

Taking into consideration function, size, accessibility and style, we have an Opulence glass shower door to suit all practical requirements for everyday use, and to create the luxurious shower retreat you deserve.

HALF HEIGHT GLASS DOORS

At 750mm high and featuring 6mm CE approved toughened safety glass, this style of door will compliment any modern easy access shower or wetroom when assisted showering is required.

An easy to grip door handle and optional door latch compliment the effortless opening and closing action provided by the 180° rise & fall, chrome plated, solid brass door hinges.

FULL HEIGHT GLASS DOORS

1900mm high, with 6mm toughened safety glass, this option, whilst functioning as a shower enclosure that can be used by all the family, allows the doors top panels to be opened independently for assisted showering.

The 850mm high bottom door panel projects above standard pedestal wash hand basins allowing the top panels to clear other bathroom items.

Opening and closing our full height glass enclosures is made trouble-free using the easy grip internal and external handles.

Full height glass screens 700mm - 1200mm are manufactured from 8mm toughened safety glass for additional safety.

A single or pair of full height glass screens can create a desirable and modern, unobtrusive walk-in shower should you wish to plan ahead for your future safety or when the need for assisted showering is no longer required.

PLEASE NOTE:

Due to the nature of all glass shower doors, we cannot guarantee they are 100% watertight. We do not approve the use of power showers with easy access shower doors and shower trays.
